SMALL ANIMAL SUBJECT INDEX

A

- Anthelmintics effective against nematodes and cestodes, 597-601
 dichlorophen-toluene, 597
 febantel-praziquantel-pyrantel embonate, 599
 febantel-praziquantel, 598
 fenbendazole, 598
 mebendazole, 597-598
 nitroscanate, 598
 Ascites, 1063-1075
 case example, 1069-1072
 diagnostic workup, 1068-1069
 differential diagnosis, 1064-1068
 history, 1063
 physical examination, 1063-1064
 Atrial fibrillation, 1327-1333
 coexisting arrhythmia, 1330-1331
 hemodynamic consequences, 1329-1330
 management in dogs, 1331-1332
 use of quinidine in horses, 1332
 ventricular rate, 1328-1329
 Autoimmune hemolytic anemia,
 dogs, 53-59, 68
 alloimmune hemolytic anemia, 58-59
 causes of autoimmune hemolytic anemia, 54-55
 clinical and laboratory findings, 55-56
 direct antiglobulin test, 54
 treatment, 57-58

B

- Blood transfusion, feline, 469-475
 collection, storage, and administration, 469-471
 crossmatching, 474
 frequency of blood types, 471-474
 how much blood to give, 474
 indications for blood transfusions, 469
 peculiarities of feline hematology, 469
 Bowel disease, feline idiopathic
 inflammatory, 509-518
Brucella canis infection, clinical signs and diagnosis, 763-767, 770-773
 antibiotic therapy for *Brucella canis*, 770-771
 clinical signs, 764

- control of *Brucella canis* in a kennel, 771-772
 diagnosis, 764-767, 770
 transmission, 763-764

C

- Canine von Willebrand's disease, 13-23
 classification of von Willebrand's disease, 15
 diagnosis of von Willebrand's disease, 15-17
 pathobiology of von Willebrand factor, 13-15
 short-term treatment of von Willebrand's disease, 17-20
 Carcinomas in pleural effusions,
 cytology of, 187-195
 cytologic description, 188-192
 cytologic interpretation, 192-194
 sample preparation and staining, 188
 Cardiomyopathy, hypertrophy, feline, 479-492
 Cervical intervertebral disk disease,
 dogs, 1477-1489
 anatomy of the disk and related structures, 1477-1478
 clinical signs, 1479
 diagnosis, 1479-1480
 management of patients, 1480-1486
 pathogenesis, 1478-1479
 pathology, 1478
 physiology, 1478
 Ciliary dyskinesia, canine, 1440-1445
 Claw and clawbed disorders,
 canine, 1448-1459
 causes of claw disorders, 1449-1456
 clinical signs of claw disorders, 1449
 structure and function, 1448
 Claw and clawbed disorders, feline, 449-457
 Colitis, canine, 1347-1354
 approach to patients, 1349-1352
 classification of colitis, 1348-1349
 clinical signs, 1349
 incidence, 1348
 inflamed colon, 1347-1348
 mechanisms of disease, 1348
 normal colon, 1347

SMALL ANIMAL SUBJECT INDEX—CONTINUED

Congenital defects, dogs, 875-897
 Cytogenetics, pediatric, 333-341
 chromosomal abnormalities, 335
 clinical disorders with abnormal karyotypes, 335-336
 cytogenetics, 334-335
 genes and chromosomes, 335
 meiosis and mitosis, 333-334
 true hermaphroditism (intersex), 337-338
 XO (gonadal or ovarian dysgenesis or Turner's syndrome), 337
 XX males, 337
 XXX (X trisomy or superfemale), 337
 XXY (seminiferous tubule dysgenesis or Klinefelter's syndrome), 336-337

D Dentistry (see Gum-chewer syndrome)
 Dermatomyositis, canine, 855-865
 case presentation, 861-862
 clinical findings, 855-860
 differential diagnosis, 860-861
 disease with an infectious origin, 866-871
 genetic factors, 855
 immune-mediated disease with a link to canine lupus erythematosus, 866-871
 therapy, 860-861
 Dermatology (see Dermatomyositis, canine)
 Diabetes mellitus, nutritional management of complicated cases of, 176-185
 case description, 177-181
 case discussion, 181-182
 diabetes mellitus, 176-177
 exocrine pancreatic insufficiency, 177
 hepatobiliary disease, 177
 Drug and fluid therapy, pediatric patients, 313-329
 drug disposition in pediatric small animal patients, 313-322
 response to drugs in pediatric patients, 322-323
 specific drug therapy in pediatric patients, 323-327

E Epistaxis, 1035-1037, 1040-1041
 case example, 1037, 1040-1042
 diagnostic workup, 1035-1037
 differential diagnosis, 1035
 history, 1033-1034
 physical examination, 1034-1035
 Erythropoietin, clinical use of, 25-36
 biology of erythropoietin, 25-27
 erythropoietin in anemic dogs, 29-31
 erythropoietin in polycythemic dogs, 28-29
 erythropoietin-replacement therapy, 31-33
 measurement of serum erythropoietin, 27-28
 Exotics (see *Iguana iguana*, diseases of)

F Femoral head and neck, excision of, and controversy concerning adjunctive soft tissue interposition, 1463-1473

adjunctive soft tissue interposition, 1464-1465
 biceps femoris muscle sling, 1465-1470
 clinical recommendations, 1470
 femoral head and neck excision, 1463-1464
 Fluoroquinolones, 1491-1496

G Giardiasis, 604-611
 Gum-chewer syndrome, 219-225

H Head trauma management, 199-207
 functional neuroanatomy, 199-200
 initial assessment and monitoring of head-injured patients, 201-206
 pathophysiology of head trauma, 200-201
 Heatstroke, canine, 1598-1605
 Hematology, chemistry profile, and urinalysis for pediatric patients, 305-309
 evaluation of laboratory values, 307-308
 instrumentation, 306-307
 sample collection, 305
 sample handling, 305-306
 Hemolytic anemia, 1090-1098
 Hemorrhage, acute, dogs, 60-68
 causes of blood loss, 62-63
 facts about hemorrhage, 60
 initial treatment, 60-62
 transfusion, 63-65
 transfusion reactions, 64-66
 Hepatic lipidosis, feline, 459-465
 clinical description, 460-461
 diagnosis, 461-462
 pathophysiology, 459-460
 treatment, 462
 Hookworm parasites of dogs and cats, 585-595
 Hypercalcemia, 1077-1081, 1084-1087
 case example, 1081-1086
 diagnostic workup, 1081
 differential diagnosis, 1078-1081
 history, 1080-1081
 physical examination, 1081
 Hyperestrogenism, 727-729
 Hypermetabolism in illness and injury, 1284-1290
 metabolism, 1284-1287
 relationship of sepsis and trauma, 1287
 toxin and bacterial translocation, 1287-1288
 Hypocalcemia in cats, 497-507
 calcium and phosphorus homeostasis, 498-499
 calcium physiology, 497-498
 causative factors, 499-502
 clinical signs, 499
 diagnosis of hypocalcemia, 502-503
 treatment of hypocalcemia, 503-504
 Hypoglycemia, 1150-1159
 case example, 1155, 1158
 diagnostic workup, 1153-1155
 differential diagnosis, 1152-1153
 history, 1151
 physical examination, 1151-1152

SMALL ANIMAL SUBJECT INDEX—CONTINUED

I

- Icterus, 1045-1059
 - background, 1045-1046
 - case example, 1055-1057
 - diagnostic approach, 1050, 1054-1055
 - differential diagnosis, 1049-1050
 - history, 1046-1047
 - physical examination, 1047-1049
- Iguana iguana*, diseases of, 1335-1343
 - anesthesia, 1336-1337
 - diagnostic procedures, 1335-1336
 - diseases, 1337-1342
- Intraocular dirofilariasis, 209-217
 - materials and methods, 209
 - results, 209-212
- Iron metabolism, 39-43, 51
 - acute-phase response, 41
 - anemia, 41-42
 - corticosteroids, 42
 - iron deficiency, 40-41
 - iron overload, 42
 - iron-binding proteins, 39
 - sample handling, 40
 - serum iron analysis, 40

N

- Neurologic abnormalities, anesthetic management of patients with, 163-173, 183
 - anesthetic agents and cerebral hemodynamics, 165-166
 - evaluation of clinical signs, 164-165
 - intracranial physiology, 163-164
 - supportive care, 166-170
- Nutrition of sporting and working dogs, 1608-1615

O

- Ophthalmology (see also Intraocular dirofilariasis), comparative, recent developments in, 1304-1323, 1333
- Orthopedic conditions, canine
 - pediatrics, 287-301
 - avascular necrosis of the femoral head, 290
 - fragmented coronoid process, 296
 - hip dysplasia, 290-294
 - hypertrophic osteodystrophy, 294-295
 - osteochondrosis, 288-290
 - panosteitis, 294
 - united anconeal process, 295-296

P

- Paraproteinemias, 621-625, 628-632
 - cellular origins of paraproteins, 621-622
 - clinical disease associated with paraproteinemias, 622-624
 - clinical signs, 625, 628-629
 - treatment, 629-630
- Paresis and paralysis, 1179-1193
 - case example, 1190-1192
 - diagnostic workup, 1189-1190
 - differential diagnosis, 1186-1189
 - history and signalment, 1181
 - pathophysiology, 1179-1180

- physical and neurologic examinations, 1181
- problem assessment, 1181-1186
- Paternity testing, 44-51
 - genetic principles, 44-45
 - genetic systems used in pedigree substantiation, 45-47
 - molecular approaches to pedigree substantiation, 47-49
- Physical therapy, 1583-1594
- Placental sites, subinvolution in dogs, 789-793, 796
- Polyuria and polydipsia, 1161-1177, 1207
 - case example, 1175-1174
 - diagnostic differentials, 1163-1169
 - diagnostic workup, 1169-1173
 - history, 1162-1163
 - physical examination, 1163
- Portosystemic shunts, feline, 1295-1301
 - diagnosis, 1296-1297
 - pathophysiology, 1295-1296
 - postsurgical care, 1298-1299
 - presurgical medical management, 1297
 - surgery, 1297-1298
- Problem solving in small animal practice, 1030-1031
 - data base, 1030
 - plan, 1031
 - problem list, 1030-1031
 - progress notes, 1031
- Pyometra, diagnosis and treatment in bitches, 777-785
 - clinical examination and diagnosis, 779-781
 - pathogenesis, 777-778
 - pathology, 781
 - treatment, 781-783

R

- Renal failure, feline, 127-153
 - clinical, biochemical, and morphologic characteristics of feline renal failure, 129-135
 - importance of renal failure in cats, 127-129
 - improvement of the diagnosis, prognosis, therapy and monitoring of feline renal failure, 135-152

S

- Soft tissue injuries associated with pelvic fractures, 921-931
 - diagnostic modalities, 923-930
 - soft tissue injuries, 921-923
- Spirocerosis, canine, and associated esophageal sarcoma, 577-580, 601
 - associated sarcoma, 579-580
 - description, 577
 - life cycle, 577
 - pathogenesis, 578-579
- Sporting breeds, hematologic and biochemical analytes of, 1574-1581, 1594
- Stress and burnout, 157-160
 - developing coping skills, 158-161
 - tangible coping skills, 161
- Surgical and anesthetic management, puppies

SMALL ANIMAL SUBJECT INDEX—CONTINUED

and kittens, 345-359
Suture closure, buried continuous, 907-919
equipment and materials, 909-910
indication, 908
postsurgical considerations, 917
technique, 910-917

T Tracheobronchial foreign bodies of plant
origin, hunting dogs, 900-905
materials and methods, 901
results, 901-903

U Ultrasonography, small animal reproductive
organs, 739-747
female reproductive system, 740-742
male reproductive system, 742-744
physics of ultrasonographic
imaging, 739-740
Urethrostomy, perineal, in cats, 1195-1207
anesthetic considerations, 1197
complications and procedure

modifications, 1202-1204
functional anatomy of the feline
urethra, 1195-1197
indications, 1195
surgical procedure, 1197-1202
Uterine adenocarcinoma, dogs, 731-737
Uterine cervix, canine, anatomy of, 751-761
material and methods, 751-752
results, 752-755

V Vaccination, heartworm, progress toward
prevention of infection, 613-617
criteria for a good vaccine antigen, 615
generating antigens in sufficient quantity, 615
immune response to the parasites, 614
immunologic protection from
infection, 613-614
less straightforward obstacles of vaccine
development, 616
preliminary evaluation of candidate vaccine
antigens, 615
target of the immune response, 614

<i>Issue</i>	<i>Pages</i>	<i>Issue</i>	<i>Pages</i>
January	70-85	July	934-951
February	226-243	August	1100-1115
March	360-381	September	1212-1227
April	524-559	October	1356-1377
May	658-663	November	1498-1525
June	800-819	December	1616-1637

EQUINE SUBJECT INDEX

A

- African horse sickness, 259-241
- Anthelmintic therapy, daily, 651
- daily anthelmintics used in horses, 652-653
- parasite control programs using pyrantel tartrate administered daily, 653-654

C

- Cerebrospinal fluid collection, 229-238
 - collection, 232-236
 - composition and the blood-cerebrospinal fluid-brain barrier, 231-232
 - formation, circulation, and absorption, 229-231
 - function, 231
 - pressure determination, 236-237
 - samples, 237
- Corneal dystrophies and degenerations, 945-950
 - calcium and lipid degeneration, 948-949
 - corneal scars, 949
 - endothelial degeneration, 945-947
 - linear or striate dystrophy, 947
 - multifocal punctate corneal degeneration, 947-948
- Corneal stromal infections, 363-371
 - corneal stromal abscesses, 366-369
 - insidious infectious stromal keratitis, 369-370
 - onchocerciasis, 370
 - ulceration with infection, 363-366

D

- Dermatophilosis, 1618-1623, 1631
 - case presentation, 1618-1619
 - clinical signs, 1620
 - differential diagnosis, 1621
 - prognosis, 1622
 - therapy, 1626

E

- Ectopic ureters, 802-807
 - clinical signs, 802-803
 - diagnosis, 804-805

- differential diagnosis and initial workup, 805-804
- embryology and pathophysiology, 802
- prognosis, 806
- treatment, 805-806
- Enterolithiasis, 1104-1115
 - clinical presentation, 1104-1105
 - composition, 1106-1107
 - factors associated with the formation of enteroliths, 1107-1109
 - incidence, 1104
 - medical management, 1111
 - methods of diagnosis, 1109-1110
 - morphology, 1105-1106
 - prognosis, 1111
 - sites of enterolith obstruction, 1105
 - treatment, 1110-1111
- Equine degenerative myeloencephalopathy
 - clinical signs and pathogenesis, 1215-1221
 - clinical signs, 1216-1217
 - pathogenesis, 1218-1220
 - pathology, 1217-1218
 - diagnosis and treatment, 1633-1637
 - diagnosis, 1633-1634
 - therapeutics and prophylaxis, 1634-1636
- Exertional rhabdomyolysis, prophylaxis for
 - chronic, 80-82
 - dantrolene, 80-81
 - electrolytes and sodium bicarbonate, 81
 - miscellaneous substances, 81-82
 - phenytoin, 82
 - tranquilizers, 82

F

- Foals, differentiating enteritis and conditions that require surgery, 535-537
- Foals, feeding from birth to weaning, 526-533
 - feeding grain and hay or pasture, 528-532
 - feeding milk and milk replacer, 526-528

H

- Headshaking, 1369-1371, 1376
 - definition, 1370
 - recent observations, 1371
 - review of the literature, 1369-1370

EQUINE SUBJECT INDEX—CONTINUED

- I** Intestinal ileus, management
of, 1102-1103, 1113
causes, 1102
endotoxemic ileus, 1113
management, 1103, 1113
signs, 1103
Intestinal ischemia, perioperative medical
therapy for horses with, 1514-1525
clinical sequelae of intestinal ischemia and
reperfusion, 1515-1516
pathophysiology of intestinal
ischemia, 1514-1515
pathophysiology of intestinal reperfusion
injury, 1515
perioperative medical therapy, 1516-1520

- K** Keratitis, infectious, evaluation and
management, 372-375
evaluation, 372-375
treatment, 375-379
Keratomycosis, 936-944, 950
causes and predisposing factors, 936-937
diagnosis, 939-940
history and clinical signs, 937-939
incidence, 936
prognosis, 943-944
treatment, 940-943

- L** Large colon, surgery of, 1501-1507
positioning, 1501-1502
preparation, 1501
principles of large intestinal
surgery, 1502-1503
surgery of the cecum, 1503-1504
surgery of the large colon, 1504-1505

- M** Motor neuron disease, 1222-1226
clinical course, 1223-1224
clinical examination, 1222-1223
diagnosis, 1224
differential diagnosis, 1224
laboratory findings, 1224
necropsy findings, 1224-1225
signalment and history, 1222
Myelography, 72-79
anatomy and measurement, 74-75
case studies, 74
complications and
contraindications, 75-74
spinal cord compression, 75-77
technique, 72-73

- N** Nutrition (see Foals, feeding from birth to
weaning)

- O** Osteochondrosis, radiographic signs
of, 809-815, 819
causes, 810
pathophysiology, 809-810
sites and radiographic appearance, 810-814
treatment and prognosis, 814-815
Ophthalmology (see Corneal dystrophies and
degeneration; Corneal stromal
infections; Keratitis, infectious)

- P** Parasite-associated diarrhea, 642-649, 663
coccidiosis, 648
cryptosporidiosis, 648
cyathostomiasis, 642-644
giardiasis, 646
strongyloidosis, 645-646
strongylosis, 644-645
trichomoniasis, 646-648
Parasitic encephalomyelitis, 1624-1631
Parasitology (see Parasite-associated diarrhea;
Parasitic encephalomyelitis; Protozoal
myeloencephalitis; Strongyles, small;
Tapeworms of the gastrointestinal tract)
Protozoal myeloencephalitis, 1359-1367
causative organism, 1364-1366
clinical signs, 1360-1362
diagnostic aids, 1362-1363
lesions, 1364
treatment, 1363-1364

- S** Small intestine, surgery of, 1508-1513
basic techniques, 1508-1509
complications, 1512
specific techniques, 1509-1512
Strongyles, small, 816-819
how cyathostomes cause disease, 817
life cycle, 816-817
role of immunity, 817-818

- T** Tapeworms of the gastrointestinal
tract, 655-662
life cycle, 656-657
morphology and diagnosis, 655-656
pathogenesis, 658-659
prevalence, 657-658
treatment, 659-660

- U** Ultrasonography, use of real-time in bovine
and equine reproduction, 1116-1125

FOOD ANIMAL SUBJECT INDEX

A

- Anthelmintic treatment of beef cows, effects on parasitologic and performance parameters, 678-687
- considerations in experimental design and analysis, 682-684
- cost-benefit analysis, 684
- parasitologic parameters, 678-681
- performance parameters, 681-682

C

- Clinical indications for dietary ionophores in ruminants, 989-993, 1003
- antiketogenic effects, 991
- atypical interstitial pneumonia prevention, 992
- control of protozoal disease, 989-991
- enhanced protein utilization, 992
- enhances reproductive performance, 992
- face fly control, 992
- feed efficiency, 989
- grain engorgement prevention, 991
- rate of gain, 989
- reduction of methane production, 991
- Coccidial infection (enteric) and coccidiosis in swine, 698-702
- clinical signs and lesions caused by *Isospora suis*, 700
- diagnosis of *Isospora suis*, 700-701
- epidemiology, treatment, and control of *Isospora suis*, 701
- life cycle of *Isospora suis*, 698-700
- taxonomy, structure, and importance, 698
- Colostrum transfer, neonatal calf management, 265-270
- benefits of colostrum, 266
- failure of acquisition of passive immunity, 266-268
- Computerized food animal medical records for disease surveillance and residue avoidance, 981-985
- custom treatments, 985
- economic and management applications, 985
- general system features, 982
- residue avoidance applications, 985
- treatment guidance, 982-983
- veterinary auditing of treatment programs, 985-985
- Cryptosporidiosis in calves, 1005-1007
- clinical manifestations, 1006
- Cryptosporidium muris*, 1007
- Cryptosporidium parvum*, 1005
- diagnosis, 1006
- transmission, 1006-1007
- treatment, 1007
- Cutaneous neoplasms, bovine, 1405-1419
- epithelial neoplasms, 1406-1409
- lymphoreticular neoplasms, 1413-1414
- melanocytic neoplasms, 1414
- mesenchymal neoplasms, 1409-1413

D

- Dairy herd performance, graphic monitoring of, 397-402

- creating the graphs, 397-398
- example herd, 399-402
- making a difference, 399
- objective of monitoring herd performance, 398
- reviewing the data, 398-399

- Diarrhea in neonatal calves, investigation of herd management practices, 385-395
- facilities and utensils: dairy calves, 386-388
- nutrition, 388-390
- personnel management, 388
- recognizing a problem, 386
- therapeutic interventions, 390-393

E

- Economic issues
- epidemiology and pathophysiology, 1127-1133
- causes, 1128
- occurrence, 1127-1128
- pathophysiology, 1128-1132
- farm size, dairy, impact on veterinary services, 1641-1645
- milk price and dairy health management, 1529-1533, 1554
- dairy price support programs, 1531-1532
- importance of milk price, 1529-1530
- methods of determining milk price, 1530-1531
- Epidemiologic principles in dairy production medicine, 1535-1541, 1555
- determinants of production, 1535-1536
- determining production, 1537-1555
- sources of production information, 1536
- Erythropoietic porphyria, bovine
- congenital, 822-826
- clinical findings, 823-824
- epidemiology, 822-823
- necropsy findings, 824
- pathogenesis, 823

F

- Fly control in swine operations, 689-692
- biting flies, 689-690
- control of biting flies, 691-692
- control of nonbiting flies, 692
- nonbiting flies, 691

H

- Health security, an increasing role for swine practitioners, 425-427
- disease entry, 426
- safe introduction of replacement breeding stock, 426-427
- Horn fly insecticide resistance, 694-702
- biology, 694-695
- control, 695
- economic impact, 695
- horn fly insecticide resistance, 695-696
- management strategies, 696-697
- Human health in swine practice, 99-101, 110
- noise exposure in swine practice, 101
- respiratory effects of swine confinement operations, 102, 110
- zoonotic disease, 99-101

FOOD ANIMAL SUBJECT INDEX—CONTINUED

- M** Mastitis control in dairy herd with high prevalence of subclinical mastitis, 969-979, 1007
 client mastitis management program, 970-974
 milking machines and subclinical infection, 974-975
 Milk production, changes, 549-553
 incremental shifts in 305-day milk production, 551-552
 lactation curve analysis, 549-551
 peak milk production, 551
 sample application, 552-553
 sign test on incremental 305-day milk production, 552

- N** Nematodiasis, effects of subclinical bovine gastrointestinal disease, 669-677, 687
 effects of subclinical parasitism, 670-672
 pathophysiologic mechanisms, 672-674
 Neonatal diarrhea in calves, diagnosis and intervention in problem herds, 995-1003
 establishing a diagnosis, 995-997
 intervention in problem herds, 997-1101

- P** Parasitism in swine, food safety issues, 831-839
 carcass and tissue dispositions, 834-836
 parasitic zoonoses, 836-837
 residues, 831-834
Pasteurella haemolytica leukotoxin in virulence and immunity in shipping fever pneumonia, 1249-1254
 future outlook, 1259
 genetic and molecular characteristics, 1250
 immunity, 1257-1259
 molecular pathogenesis, 1251-1253, 1256-1257
 target cell specificity, 1250-1251
 toxin mechanism, 1251
 Pelvic measurements and dystocia in beef heifers, critical analysis of, 405-409
 Pregnancy examination, diagnostic adjuncts to, 256-262
 application in beef practice, 259-261
 measuring body condition, 258-259
 nutrition and reproduction, 257-258
 Problem-oriented diagnostics, statistical inferences, and clinical decisions, 1009-1015
 confirmatory testing, 1012
 differential building and test selection, example of, 1011
 differentiating infection from clinical disease, 1013-1014
 exclusionary testing, 1011
 false-positive results and serial test procedures, 1012-1013
 indications of routine testing, 1010
 signalment, history, and physical examination, 1009-1010
 tests, 1010
 Productivity and profitability of beef cattle, systematic approach for improvement, 1237-1246

- establish a data base for the herd, 1239-1240
-
- establish a ranch plan, 1242-1245
-
- establish ranch goals, 1239
-
- evaluate improvements, 1246
-
- identify areas for improvement, 1242
-
- identify areas of financial deficiency, 1242
-
- identify areas of production deficiency and their risk factors, 1240-1242
-
- implement and monitor the ranch plan, 1245-1246
-
- methodology, 1239
-
- timetable for implementation, 1245
-
- Psyllium mucilloid supplementation, neonatal calf scours, 247-255
-
- intestinal cell proliferation and function, 250-251
-
- intestinal disaccharidase activity, 249
-
- intestinal microbial growth and metabolism, 249-250
-
- mucosal permeability and enteric bacterial translocation, 251-252
-
- oral monosaccharide tolerance, 248-249
-
- relief of symptoms in other intestinal disorders (humans), 252-253

- R** Rectal prolapse, surgical options, 554-558
 amputation, 555-557
 submucosal resection, 554-555
 Reproductive herd health, 87-90, 110
 aggressive prostaglandin intervention, 89-90
 body condition scoring—the better palpation investment, 90, 110
 early pregnancy diagnosis, 90
 monitoring heat detection, 88-89
 records analysis, 87-88
 Risk management in pork production, 1381-1395
 classification of risk, 1386-1387
 defining risk, 1382-1384
 risk management process, 1387-1391
 Rumen lactic acidosis
 clinical signs, diagnosis, treatment, and prevention, 1265-1270
 clinical signs, 1265-1266
 laboratory evaluation, 1266
 diagnosis, 1266-1267
 prognosis, 1267
 treatment, 1267-1268
 prevention, 1268-1270
 epidemiology and pathophysiology, 1127-1133
 causes, 1128
 occurrence, 1127-1128
 pathophysiology, 1128-1132

- S** Salmonellosis, porcine, 411-423, 428
 general characteristics of *Salmonella*, 411-414
 principles of immunity against *Salmonella*, 414-417
 vaccination and immunity against *Salmonella*, 417-420
 Slaughterchecks, use to evaluate porcine reproductive failure, 542-547

FOOD ANIMAL SUBJECT INDEX—CONTINUED

- abnormalities and pathologic changes, 545-546
- analysis of urine and bladder contents, 545
- epidemiologic and statistical considerations, 542-543
- indications, 542
- normal morphology, 543-545
- protocol, 545
- Sows, gestating, management of, 1395-1401, 1419
 - feeding management, 1397-1398
 - housing, 1395-1397
 - parasite control programs, 1400-1401
 - pregnancy diagnostics, 1398-1400
 - vaccination and immunization, 1401, 1419
- Spongiform encephalopathy, bovine, 1647-1656
 - activities in other countries, 1655
 - background, 1647-1648
 - clinical features, 1648-1649
 - control, 1652
 - diagnosis, 1650
 - differential diagnosis, 1649
 - epidemiology, 1650-1652
 - human spongiform encephalopathy, 1648
 - other forms of spongiform encephalopathy, 1649
 - United States position on bovine spongiform encephalopathy, 1652-1653
- Swine industry, strategic issues in, 105-109
 - implications, 108-109
 - objectives, 105
 - survey design and data sources, 103-104
 - survey results, 104-108

T

- Toxoplasmosis infection in sheep, 1543-1549
 - case study, 1546-1547
 - diagnosis, 1544-1545
 - history, 1543
 - life cycle, 1543-1544
 - pathogenesis, 1544
 - prevention and control, 1545-1546
 - public health considerations, 1546
 - treatment, 1545

U

- Ultrasonography, use of real-time in bovine and equine reproduction, 1116-1125
 - applications in cows, 1119-1120
 - applications in mares, 1120-1122
 - common artifacts, 1117-1118
 - instruments, 117
 - physics of ultrasound imaging, 1116-1117
 - reproductive system examination, 1119
 - reproductive system examination of bulls and stallions, 1122-1123
 - terminology, 1117
